Why does actively managing receivables matter?

Effective receivables management can substantially improve a company’s cash flow. Quick receivables turn-around times accelerate payments, reduce bad debts, increase working capital and minimize capital needs. Closely monitor accounts receivable and be consistent with how you handle past due invoices.

Key actions to take:

- **Invoice promptly**: Invoicing promptly at time of or immediately after providing a service or delivering a product converts a sale to a receivable. The longer you take to invoice, the higher the chance that you will miss sending invoices or delay payment and affect your cash flow. Adding an email invoicing system is a good option and will provide electronic tracking, save you time and reduce paper costs and postal fees.

- **Provide convenient payment methods**: The more convenient the payment method, the easier it is for your customers to pay you. Allow multiple options, like credit cards and checks to make it convenient for your customers. Having more than one payment receipt option, such as online or by mail, offers your customers options and can reduce the time it takes to get payments in the door.

- **Track receipts**: Determine a process for managing accounts receivable and adhere to it. Make sure a payment is processed and posted to a customer’s account on the same day it is received. Establish how frequently to create, print/email and send invoices including when to follow up with customers that are beyond their payment window. Keep good documentation on all customer conversations, notes on orders and agreed-upon terms. Document and keep track of unmatched payments and have a process to match them to proper invoices.

- **Know your customer’s payment history**: Understanding your customer’s payment history can save you from a lot of headaches. Not every customer will pay the moment they receive an invoice. Most will have established cycles for when they send out payments, and those cycles may...
How SunTrust can help

Collecting cash keeps the cash cycle flowing. SunTrust products and services can help get receivables in the bank.

SunTrust Merchant Services is a suite of solutions that allows you to accept and access funds for various types of payment — in-store, online, or through a mobile device. Your business will find value in faster authorizations, more options for convenience with a variety of cards accepted and stronger protection against fraud. With SunTrust Merchant Services, you can expand your payment options with a fully integrated payment processing system that accepts debit and credit cards, paper checks and contactless payments (Apple Pay™). You can use tablet and mobile devices for more portable sales opportunities while also accepting payments through your own customized website. SunTrust offers tailored versions for retail, restaurant, healthcare, personal and professional services.

Mobile Check Deposit allows you to easily deposit checks using the SunTrust Business Mobile app. Deposit large volumes of checks, securely, from any U.S. location3 with Online Check Deposit2. Checks can be scanned and processed up to 10:30 PM with next day availability. Additionally, coupon data can be scanned in or keyed to capture remittance data and minimize processing time and costs. Online Check Deposit is easy to use and only requires minimal hardware investment.
